# **Key Information Document**

# PURPOSE

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## PRODUCT

#### Commodity Swap (Payer)

- Manufacturer: UniCredit Bank S.A. www.unicredit.ro (subgroup of UniCredit S.p.A. together with its consolidated holdings)
- Call +40 21 2002020 for more information.
- Financial Supervisory Authority is responsible for supervising UniCredit Bank S.A. in relation to this Key Information Document.
- Production date of the KID: 19/09/2024

You are about to purchase a product that is not simple and may be difficult to understand.

## **1. WHAT IS THIS PRODUCT?**

#### TYPE

An Over the Counter (OTC) derivative contract – Commodity Swap (Payer)

### TERM

The product has a fixed contractually agreed term and will terminate after 1 year.

#### OBJECTIVES

Commodity swaps are used for managing commodity price risks.

A commodity swap is an agreement between two contracting parties (client/UniCredit Bank S.A.) to exchange payments, calculated on a notional quantity (fixed volume of a specific commodity) during the contractually agreed term. The payments are exchanged at certain agreed dates.

In a Commodity Swap (Payer) you pay a fixed price and receive a floating price in the same currency for a specific commodity. The fixed commodity price is determined when the contracting parties enter into the swap. The floating price can be determined as the reference price on the fixing dates or calculated as average of the reference prices for the respective calculation period. In general the parties agree to offset the two payments, so that only the amount in excess at the end of each period is actually paid.

The notional quantity of the Commodity Swap (Payer) serves merely to calculate the respective payments. There is no physical delivery of the commodity underlying.

You can enter into this product also in a foreign currency.

Sample product terms are set out below and are based on legally predefined or realistic assumptions and may not match your specific contract details.

Underlying commodity	Aluminum High Grade
Term	1 year
Calculation period	1 month
Total notional quantity	12 metric tons
Notional quantity per calculation period	1 metric ton
Client pays	USD 2,615 / metric ton
(fixed price)	monthly payments
Client receives	average of reference price on a daily basis
(floating price)	monthly payments

#### INTENDED RETAIL INVESTOR

This product is designed for retail investors who

- (i) hold this product for the contractually agreed term,
- (ii) are in the position to bear losses that may be unlimited and
- (iii) have comprehensive knowledge of and/or past experience with OTC derivatives and the financial markets.

## 2. WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

#### **RISK INDICATOR**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class.

Be aware of currency risk. You may pay and/or receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make payments to pay for losses. The total loss you may incur may be significant.

This product does not include any protection from future market performance so you could incur significant losses.

If we are not able to pay you what is owed, you could incur significant losses.

#### PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period: Example total notional quantity:		1 year 12 metric tons
Scenarios		lf you end after 1 year
Minimum scenario	There is no minimum guaranteed return. You may have to make further payments to cover losses.	
Stress scenario	What you might get back or pay after costs	USD -9,165
	Average return/loss over total notional quantity each year	-29.2%
Unfavourable scenario	What you might get back or pay after costs	USD -5,577
	Average return/loss over total notional quantity each year	-17.8%
Moderate scenario	What you might get back or pay after costs	USD -352
	Average return/loss over total notional quantity each year	-1.1%
Favourable scenario	What you might get back or pay after costs	USD 6,199
	Average return/loss over total notional quantity each year	19.8%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back or pay.

The favourable, moderate, unfavourable and stress scenarios represent possible outcomes, which have been calculated based on simulations using the past performance of the underlying commodity over the past 5 years. The stress scenario shows what you might get back or pay in extreme market circumstances.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. You will either be unable to cash in early or you will make a large loss if you do so.

#### 3. WHAT HAPPENS IF UNICREDIT BANK S.A. IS UNABLE TO PAY OUT?

Counterparties of derivative transactions are exposed to the risk that UniCredit Bank S.A. becomes unable to discharge its obligations under the transaction, for example in the case of an insolvency (inability to pay or overindebtedness) or in the case resolution measures are taken by an authority against the credit institution. Such a decision to take resolution measures can, for example, be taken if the assets of the institution are less than its liabilities, where it is unable or will, in the near future, be unable to pay its debts or other liabilities as they fall due, or where it requires extraordinary public financial support. Where resolution measures are taken, the competent resolution authority can decide on an early termination of the derivative transaction. In the case such early termination results in a claim of the counterparty against the credit institution, the decision of the resolution authority can lead to a partial or complete reduction of the principal amount of this claim or in a conversion of this claim in to equity (shares or other types of equity).

If UniCredit Bank S.A. does not fulfil its obligations connected with the product or is unable to pay, you can lose part of or the full payout or can suffer an unlimited loss. This product is not protected by any deposit guarantee scheme, legal or otherwise, or any other type of guarantee.

#### 4. WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest,

how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- The product does not change in value (0% annual return).
- A total notional quantity of 12 metric tons

	If you end after 1 year (Recommended holding period)
Total costs	USD 690
Annual cost impact (*)	2.2%

(\*) This illustrates how costs reduce your return in relation to total notional quantity each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.1% before costs and -1.1% after costs.

#### **COMPOSITION OF COSTS**

One-off costs upon entry or exit		If you end after 1 year
Entry costs	These costs are already included in the price you pay.	Up to USD 690
Exit costs	Not applicable	

## 5. HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

#### Recommended holding period: 1 year

The recommended holding period corresponds to the contractually agreed term. You are not entitled to unilaterally terminate the product prematurely. However, the right of early termination may be agreed for one or both contracting parties. In the event of an agreed early termination, you will either receive or pay a compensation payment, which is made up of the market value of the product and the termination costs, including a margin earned by the bank. Significant additional costs may be incurred.

## 6. HOW CAN I COMPLAIN?

You can make complaints about the product, or about the behaviour of the issuer of the product or of the person who provide information about the product or sell the product, on the following website www.unicredit.ro, in writing to UniCredit Bank SA, Corporate Treasury Sales department, 1F Expozitiei Blvd., Bucharest 012101, Romania or via e-mail to infocenter@unicredit.ro.

#### 7. OTHER RELEVANT INFORMATION

Additional product information is available on request. UniCredit Bank S.A. reviews this Key Information Document annually. The latest version of the document is available for you at www.unicredit.ro/ro/cib in section "Documente Utile" under PRIIPs tab. In addition the Key Information Document can be obtained free of charge at UniCredit Bank SA, Corporate Treasury Sales department, 1F Expozitiei Blvd., Bucharest 012101, Romania.
