One Bank, One UniCredit.

We are a simple, successful Pan European Commercial Bank, with a fully plugged-in CIB, delivering a unique Western, Central and Eastern European network to our extensive franchise of 25 million clients. Our strategy is long-term. We are transforming the Group through decisive actions to lay the groundwork for the future, changing the way we work to anticipate our clients' medium-term evolution. Everything we do is designed to make UniCredit a true Pan European Winner.

REPORT ON REVIEW OF INTERIM CONDENSED CONSOLIDATED FINANCIAL INFORMATION

To the shareholders of
UniCredit Bank S.A.

Introduction

We have reviewed the accompanying interim condensed consolidated statement of financial position of UniCredit Bank S.A. (the 'Bank') and its subsidiaries: UniCredit Consumer Financing S.A., UniCredit Leasing Corporation IFN S.A, Debo Leasing IFN SA and UniCredit Insurance Broker SRL as of 30 June 2018 and the related condensed interim consolidated statements of comprehensive income, changes in equity and cash flows for the six month period then ended. Management of the Bank is responsible for the preparation and presentation of this interim condensed consolidated financial information in accordance with IAS 34 "Interim Financial Reporting". Our responsibility is to express a conclusion on this interim condensed consolidated financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing, Regulation (EU) No. 537/2014 of the European Parliament and the Council and Law 162/2017 and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial information of the Bank is not prepared, in all material respects, in accordance with IAS 34 "Interim Financial Reporting".

1. REPORTING ENTITY

The UniCredit Group (the “Group”) consists of UniCredit Bank S.A. (the “Bank”) as parent company and its subsidiaries, UniCredit Consumer Financing IFN S.A. (“UCFIN”), UniCredit Leasing Corporation IFN S.A (“UCLC”), Debo Leasing IFN SA (“DEBO”) and UniCredit Insurance Broker SRL (“UCIB”). These consolidated financial statements comprise the Bank and its subsidiaries.

UniCredit Bank S.A. (the “Bank”), the new brand of formerly UniCredit Tiriac Bank SA until August 2015, having its current registered office at 1F, Expozitiei Boulevard, District 1, Bucharest, Romania was established as a Romanian commercial bank on 1 June 2007 upon the merger by acquisition of the former UniCredit Romania S.A. (the absorbed bank) by Banca Comerciala HVB Tiriac S.A. (the absorbing bank) and is licensed by the National Bank of Romania to conduct banking activities.

The Bank provides retail and commercial banking services in Romanian Lei (“RON”) and foreign currency. These include: accounts opening, domestic and international payments, foreign exchange transactions, working capital finance, medium and long term facilities, retail loans, bank guarantees, letter of credits and documentary collections.

UniCredit Bank S.A. is directly controlled by UniCredit SpA (Italy), with registered office in with in Milano, Piazza Gae Aulenti, 3 .

The Group is exercising direct and indirect control over the following subsidiaries:

UniCredit Consumer Financing IFN S.A., having its current registered office at 23-25 Ghetarilor Street, 1st and 3rd floor, District 1, Bucharest, Romania, provides consumer finance loans to individual clients. The Bank has a shareholding of 50.1% in UCFIN since January 2013.

UniCredit Leasing Corporation IFN S.A., having its current registered office at 23-25 Ghetarilor Street, 1st, 2nd and 4th floor, District 1, Bucharest, Romania, provides financial lease services to corporate clients and individuals. UCLC, previously associate entity, has become a subsidiary of the Bank starting with April 2014 when the Bank obtained 99.95% direct and indirect controlling interest (direct controlling interest: 99.90%). The Bank’s shareholding has changed to a direct and an indirect controlling shareholding interest of 99.98% as of 30 June 2018 (direct controlling interest: 99.96%), as a result of the merger of UCLC with UniCredit Leasing Romania SA (“UCLRO”) finalized by June 2015, when UCLRO was absorbed by UCLC.

Debo Leasing IFN S.A., having its current registered office in 23-25 Ghetarilor Street, 2nd floor, 1st district, Bucharest, Romania, is a real estate finance lease entity, has become a subsidiary of the Bank starting with April 2014. The Bank has an indirect controlling interest of 99.97% through UCLC.

UniCredit Insurance Broker S.R.L., having its current registered office in 23-25 Ghetarilor Street, 2nd floor, 1st district, Bucharest, Romania, intermediates insurance policies related to leasing activities to legal entities and individuals, in which the Bank has an indirect controlling interest of 99.98% through UCLC.

As at 30 June 2018, the Group carried out its activity in Romania through the Head Offices of the Bank and subsidiaries located in Bucharest and through its network having 151 branches (31 December 2017: 157) located in Bucharest and the country.

2. BASIS OF PREPARATION

a) Statement of compliance

These interim condensed consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”), IAS 34 – Interim Financial Reporting. These financial statements do not include all of the information required for full annual financial statements, and should be read in conjunction with the consolidated financial statements of the Bank as at and for the year ended 31 December 2017.

b) Functional and presentation currency

The consolidated financial statements are presented in Romanian Lei (“RON”), which is the functional and presentation currency. Except as indicated, financial information presented in RON has been rounded to the nearest unit.

3. SIGNIFICANT ACCOUNTING POLICIES

Except for the below mentioned changes the accounting policies applicable by the Group in the interim condensed consolidated financial statements are consistent with the accounting policies applied by the Group in the yearly consolidated financial statements for the financial period ended 31 December 2017.

Where it has been considered necessary, the comparative amounts have been reclassified in order to ensure the compliance with the changes made in the corresponding notes to the financial statements.

a) Foreign currency

Transactions in foreign currencies are translated at the foreign exchange rate ruling at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies at the end of reporting period are translated to RON at the foreign exchange rate ruling at that date. Foreign exchange differences arising on translation are recognized in the income statement. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are translated to RON at foreign exchange rates ruling at the dates the fair value was determined.

The exchange rates of major foreign currencies were:

Currencies	30 June 2018	31 December 2017	Change
Euro (EUR)	1: RON 4.6611	1: RON 4.6597	0.03%
US Dollar (USD)	1: RON 4.0033	1: RON 3.8915	2.87%

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

b) IFRS9 impact

With reference to the adoption of IFRS 9 starting with 1st January 2018, we highlight that it is the result of a long-time project aimed at creating reporting and risk monitoring methods, harmonized between Group's Legal Entities, that ensure full compliance with the standard and at updating governance and monitoring processes in light of the new rules.

This project was organized at Group level through specific work-streams:

- work-stream "Classification and Measurement" aimed at reviewing financial instruments classification in line with new IFRS9 criteria;
- work-stream "Impairment" aimed at developing and implementing models and methods for calculating impairment.

These work-streams are further integrated by a specific work-stream dedicated to adapting the models and methodologies developed to the peculiarities of Corporate & Investment Banking (CIB).

The whole project is being developed with the involvement of all the relevant departments of the Group and with an active involvement of Board of Directors.

The following should be noted with regard to the new accounting principle:

- it introduced significant changes in the rules for classifying and measuring financial instruments compared to IAS39.

With reference to loans and debt securities, the classification and consequent measurement of these instruments is based on the "business model" and on the characteristics of the financial instrument cash flows (SPPI criterion - Solely Payments of Principal and Interests).

With reference to equity instruments, they are classified as financial instruments at fair value, with differences recognized through profit or loss or in other comprehensive income. In the latter case, unlike the requirements of IAS 39 for available-for-sale financial assets, IFRS 9 no longer requires to recognize impairment losses and provides that, in the event of sale of the instrument, the profits and losses on disposal must be reclassified to other shareholders' equity reserve and not to profit or loss.

Lastly, with reference to financial liabilities designated at fair value, it modified the accounting of "own credit risk", i.e. the changes in the value of liabilities at fair value that are due to fluctuations in their creditworthiness. According to the new standard, these changes must be recognized in an equity reserve, rather than in the income statement as per IAS 39, thus eliminating a source of volatility in economic results.

- It has introduced a new accounting model of impairment for credit exposures based on (i) an "expected losses" approach replacing the current one based on the recognition of "incurred losses" and (ii) on the concept of "lifetime" expected loss.
- It has introduced guidelines that clarify when financial instruments shall be written off by specifying that the write - off constitutes an event of accounting de-recognition.
- It has also modified the rules applicable to "hedge accounting" with regard to designating a hedging relationship and verifying its effectiveness with the aim of ensuring greater alignment between the accounting recognition of hedges and the underlying management rationale. The Group has exercised the option to continue applying the existing IAS 39 hedge accounting requirements for all its hedging relationships until the IASB completes the project on accounting for macro-hedging.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

The Group has decided to exploit the option provided by the accounting standard not to restate comparative figures of previous years. Consequently, for UniCredit Group, the first time adoption of the new standard is 1st January 2018.

Details on the impact of the transition to IFRS 9 and reclassifications made are available in Note 26.

c) Financial assets and financial liabilities - Recognition and initial measurement

The Group initially recognises loans and receivables, deposits, debt securities issued and subordinated liabilities on the date that they are originated. All other financial assets and liabilities are initially recognised on the trade date at which the Group becomes a party to the contractual provisions of the instrument.

A financial asset or a financial liability is measured initially at fair value plus, transaction costs that are directly attributable to its acquisition/issue (for an item which is not at fair value through profit or loss).

d) Financial assets and financial liabilities - Classification

As a result of the entry into force of IFRS 9, the Group has reclassified financial assets and liabilities as at 1st January 2018 into the new envisaged categories.

In this regard, it should be noted that this classification is based on business model and characteristics of the contractual cash flows.

The analysis of the business model was conducted by mapping the business areas that make up the Group and by allocating a specific business model to each of them.

In this regard, the business areas that make up the Group's banking portfolio have been assigned "held-to-collect" or "held-to-collect and sell" business models according to holding intentions and expected turnover of the financial instruments.

The business areas that make up the Group's trading portfolio have been assigned an "other" business model in order to reflect trading intentions.

For the purposes of classifying financial instruments in the new categories envisaged by IFRS9, the business model analysis must be complemented by an analysis of contractual flows ("SPPI Test").

In this regard, the Group has developed systems and processes to analyse the portfolio of debt securities and loans in place and assess whether the characteristics of contractual cash flows allow for measurement at amortized cost ("held-to-collect" portfolio) or at fair value with effect on comprehensive income ("held-to-collect and sell" portfolio). The analysis in question was carried out both by contract and by defining specific clusters based on the characteristics of the transactions and using a specific internally developed tool ("SPPI Tool") to analyse the contract features with respect to IFRS9 requirements, or by using external data providers.

In application of the aforementioned rules, the Group's financial assets and liabilities have been classified as follows:

Financial assets

- Held for trading;
 - Designated at fair value through profit or loss;
 - Mandatorily at fair value;
 - At fair value through Comprehensive income;
- At amortised cost;

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial liabilities

At inception date, a financial liability is classified in one of the following categories:

- measured at amortised cost
- at fair value through profit or loss -held for trading
- designated at fair value.

d1) Financial assets and financial liabilities held for trading

i. Financial assets held for trading

A financial asset is classified as held for trading if it is:

- acquired or incurred principally for the purpose of selling or repurchasing it in the short term;
- part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking;
- it is a derivative contract not designated under hedge accounting, including derivatives with positive fair value embedded in financial liabilities other than those valued at fair value with recognition of income effects through profit or loss.

As other financial instruments, on initial recognition, at settlement date, a held-for-trading financial asset is measured at its fair value, usually equal to the amount paid, excluding transaction costs and revenue, which are recognized in profit and loss although directly attributable to the financial assets. Trading book derivatives are recognized at trade date.

After initial recognition these financial assets are measured at their fair value through profit or loss.

A derivative is a financial instrument or other contract that has all three of the following characteristics:

- its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable (usually called the 'underlying') provided that in case of non-financial variable, this is not specific of one of the parties to the contract;
- it requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors;
- it is settled at a future date.

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract, with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative.

An embedded derivative is separated from financial liabilities other than those measured at fair value through profit or loss and from non-financial instruments, and is recognized as a derivative, if:

- the economic characteristics and risks of the embedded derivative are not closely related to those of the host contract;
- a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

- the hybrid (combined) instrument is not measured entirely at fair value through profit or loss.

When an embedded derivative is separated, the host contract is accounted for according to its accounting classification.

ii. Financial liabilities held for trading

Financial liabilities held for trading include:

- derivatives that are not designated as hedging instruments;
- obligations to deliver financial assets borrowed by a short seller (i.e. an entity that sells financial assets it does not yet own);
- financial liabilities issued with an intention to repurchase them in the near term;
- financial liabilities that are part of a portfolio of financial instruments considered as a unit and for which there is evidence of a recent pattern of trading.

Financial liabilities held for trading, including derivatives, are measured at fair value on initial recognition and during the life of the transaction.

The Group has trading instruments at 30 June 2018 held for trading financial instruments, derivative assets and derivative liabilities incurred in transactions with customers and economically covered with back-to-back transactions within UniCredit Group.

d2) Financial assets and financial liabilities at fair value through profit and loss

A non-derivative financial asset can be designated at fair value if said designation avoids accounting mismatches that arise from measuring assets and associated liabilities according to different measurement criteria.

These assets are accounted for alike “Financial assets held for trading”.

Financial liabilities, like financial assets, may also be designated, according to IFRS9, on initial recognition as measured at fair value, provided that:

- this designation eliminates or considerably reduces an accounting or measurement inconsistency that would arise from the application of different methods of measurement to assets and liabilities and related gains or losses; or
- a group of financial assets, financial liabilities or both are managed and measured at fair value under risk management or investment strategy which is internally documented with the entity’s key management personnel.

This category may also include financial liabilities represented by hybrid (combined) instruments containing embedded derivatives that otherwise should have been separated from the host contract.

Financial liabilities presented in this category are measured at fair value at initial recognition and for the life of the transaction.

The changes in fair value are recognized in the income statement except for any changes in fair value arising from changes in their creditworthiness, which are shown under item Revaluation reserves of shareholders’ equity unless such accounting results in an inconsistency that arises from the application of different methods of measuring assets and liabilities and related gains or losses, in which case also the changes in fair value deriving from changes in creditworthiness are recorded in the income statement.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

The Group designates financial assets and liabilities at fair value through profit and loss when either:

- The assets and liabilities are managed, evaluated and reported internally on a fair value basis;
- The designation eliminates or significantly reduces an accounting mismatch which would otherwise arise; or
- The asset or liability contains an embedded derivative that significantly modifies the cash flows that would otherwise be required under the contract.

d3) Financial assets and financial liabilities at amortized cost

A financial asset is classified within the financial assets measured at amortized cost if:

- its business model is held to collect;
- its cash flows are solely the payment of principal and interest.

These items also include the net value of finance leases of assets under construction or awaiting lease, provided the leases have the characteristics of contracts entailing the transfer of risk.

On initial recognition, at settlement date, financial assets at amortized cost are measured at fair value, which is usually equal to the consideration paid, plus transaction costs and income directly attributable to the instrument.

After initial recognition at fair value, these assets are measured at amortized cost which requires the recognition of interest on an accrual basis by using the effective interest rate method over the term of the loan.

The carrying amount of financial assets at amortized cost is adjusted to take into account the reductions / write –backs resulting from the valuation process asset out in the specific section7.

Financial liabilities measured at amortized cost comprise financial instruments (other than liabilities held for trading or those designated at fair value) representing the various forms of third-party funding.

These financial liabilities are recognized at settlement date initially at fair value, which is normally the consideration received less transaction costs directly attributable to the financial liability. Subsequently these instruments are measured at amortized cost using the effective interest method.

Hybrid debt instruments relating to equity instruments, foreign exchange, credit instruments or indexes, are treated as structured instruments. The embedded derivative is separated from the host contract and recognized as a derivative, provided that separation requirements are met, and recognized at fair value. The embedded derivative is recognized at its fair value, classified as financial assets or liabilities held for trading and subsequently measured at fair value through profit or loss.

The difference between the total amount received and the initial fair value of the embedded derivative is attributed to the host contract.

Securities in issue are recognized net of repurchased amounts; the difference between the carrying value of the liability and the amount paid to buy it in is recognized into profit and loss. Subsequent disposal by the issuer is considered as a new issue which doesn't produce gains or losses.

d4) Other financial assets mandatory at fair value

A financial asset is classified as financial asset mandatorily at fair value if it does not meet the conditions, in terms of business model or cash flow characteristics, for being measured at amortized cost or at fair value through other comprehensive income.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Specifically, in this portfolio have been classified equity instruments for which the Group does not apply the option granted by the standard of valuing these instruments at fair value through other comprehensive income.

The following type of assets could also be classified in this portfolio:

- debt instruments, securities and loans for which the business model is neither held to collect nor held to collect and sell but which are not part of the trading book;
- debt instruments, securities and loans with cash flows that are not solely payment of principal and interest;
- units in investment funds.

These assets are accounted for alike “Financial assets held for trading”.

d5) Financial assets at fair value through Comprehensive income

A financial asset is classified as at fair value through comprehensive income if:

- its business model is held to collect and sell;
- its cash flows are solely the payment of principal and interest.

This category also includes equity instruments for which the Group applies the option granted by the standard of valuing the instruments at fair value through other comprehensive income.

On initial recognition, at settlement date, a financial asset is measured at fair value, which is usually equal to the consideration paid, plus transaction costs and revenues directly attributable to the instrument.

After initial recognition, the interests accrued on interest-bearing instruments are recorded in the income statement according to the amortized cost criterion.

The gains and losses arising from changes in fair value are recognized in the Statement of comprehensive income and shown under Revaluation reserves in shareholders' equity.

These instruments are tested for impairment as illustrated in the specific section.

Impairment losses are recorded in the income statement with contra-entry in the statement of comprehensive income and also shown under Revaluation reserves in shareholders' equity.

In the event of disposal, the accumulated profits and losses are recorded in the income statement. With regard to equity instruments, the gains and losses arising from changes in fair value are recognized in the Statement of comprehensive income and shown under Revaluation reserves in shareholders' equity. In the event of disposal, the accumulated profits and losses are recorded in Other Reserves.

In accordance with the provisions of IFRS9, no impairment losses on equity instruments are recognized in the income statement.

e) Financial assets and liabilities - de-recognition and modification

Renegotiations of financial instruments which cause a change in contractual conditions are accounted for depending on the significance of the contractual change itself.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

In particular, when renegotiations are not considered significant the gross exposure is re-determined through the calculation of the present value of cash flows following the renegotiation at the original effective interest rate. The difference between the gross exposure before and after renegotiation, adjusted to consider changes in the related loan loss provision, is recognized in P&L as modification gain or loss.

In this regard, renegotiations achieved both by amending the original contract or by closing a new one, are considered significant when they determine the expiry of the right to receive cash flows accordingly to the original contract.

In particular, rights to receive cash flows are considered as expired in case of renegotiations that introduce contractual clauses which determine a change in the financial instrument classification, which determine a change in the currency or which are carried out at market conditions therefore without causing credit concession.

The Group derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Group is recognised as a separate asset or liability.

On de-recognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset transferred), and consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss. In addition, any cumulative gain or loss that had been recognised in other comprehensive income is also recognised in profit or loss.

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled or expired.

f) Purchased or Originated Credit Impaired - POCI

When on initial recognition an exposure, presented in "Financial assets at fair value through comprehensive income" or "Financial assets at amortized cost", is non performing, it is qualified as "Purchased Originated Credit Impaired- POCI".

The amortized cost and the interest income generated by these assets are calculated by considering, in the estimate of future cash flows, the expected credit losses over the entire residual duration of the asset.

This expected credit loss is subject to periodic review thus determining the recognition of impairment or write-backs.

Purchased Originated Credit Impaired assets are conventionally classified on initial recognition in Stage 3.

If, as a result of an improvement in the creditworthiness of the counterparty, the assets become "performing" they are classified under Stage 2.

These assets are never classified under Stage 1 because the expected credit loss is always calculated considering a time horizon equal to their residual duration.

In addition to purchased impaired assets, the Group identifies as "Purchased Originated Credit Impaired" those credit exposures that are originated in the case of restructuring of an impaired exposure which led to the provision of new finance which is deemed significant either in absolute terms or in relative terms compared with the amount of the original exposure.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

g) Amortised cost measurement

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

h) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the Group measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If a market for a financial instrument is not active, the Group establishes fair value using a valuation technique. Valuation techniques include using recent arm's length transactions between knowledgeable, willing parties (if available), reference to the current fair value of other instruments that are substantially the same, discounted cash flow analyses and option pricing models. The chosen valuation technique makes maximum use of market inputs, relies as little as possible on estimates specific to the Group, incorporates all available factors that market participants would consider in setting a price, and is consistent with accepted economic methodologies for pricing financial instruments. Inputs to valuation techniques reasonably represent market expectations and measures of the risk-return factors inherent in the financial instrument.

The best evidence of fair value of financial instruments at initial recognition is the transaction price, i.e. the fair value of the consideration given or received, unless the fair value of the instrument is evidenced by comparison with other observable current market transactions in the same instrument or based on a valuation technique whose variables include only observable data from the market.

The fair value of a demand deposit is not less than the amount payable on demand, discounted from the first date on which the amount could be required to be paid.

Where a fair value cannot be reliably estimated, unquoted equity instruments that do not have a quoted market price in an active market are measured at cost and periodically tested for impairment.

i) Identification and measurement of impairment

Loans and advances to clients and banks and debt securities classified as financial assets at amortized cost, financial assets at fair value through comprehensive income and relevant off-balance sheet exposures are tested for impairment as required by IFRS9.

In this regard, these instruments are classified in stage 1, stage 2 or stage 3 according to their absolute or relative credit quality with respect to initial disbursement. Specifically:

- Stage 1: includes (i) newly issued or acquired credit exposures, (ii) exposures for which credit risk has not significantly deteriorated since initial recognition, (iii) exposures having low credit risk (low credit risk exemption).

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

- Stage 2: includes credit exposures that, although performing, have seen their credit risk significantly deteriorating since initial recognition.
- Stage 3: includes impaired credit exposures.

For exposures in stage 1, impairment is equal to the expected loss calculated over a time horizon of up to one year. For exposures in stages 2 or 3, impairment is equal to the expected loss calculated over a time horizon corresponding to the entire life of the exposure.

In order to meet the requirements of the standard, the Group has developed specific models to calculate expected loss based on PD, LGD and EAD parameters, used for regulatory purposes and adjusted in order to ensure consistency with the accounting regulations.

In this context “forward looking” information was included through the elaboration of specific scenarios.

The Stage Allocation model is a key aspect of the new accounting model required to calculate expected credit losses. In the Group, the Stage Allocation model was based on a combination of relative and absolute elements. The main elements were:

- comparison, for each transaction, between PD as measured at the time of origination and PD as at the reporting date, both calculated according to internal models, through thresholds set in such a way as to consider all key variables of each transaction that can affect the bank's expectation of PD changes over time (e.g. age, maturity, PD level at the time of origination)
- absolute elements such as the backstops required by law (e.g. 30 days past-due)
- additional internal evidence (e.g. Forborne classification).

With regard to debt securities, the Group opted for application of the low credit risk exemption on investment grade securities in full compliance with IFRS 9 accounting standard.

Allowances for impairment of loans and receivables are based on the present value of expected cash flows of principal and interest. In determining the present value of future cash flows, the basic requirement is the identification of estimated collections, the timing of payments and the discount rate used.

The amount of the loss on impaired exposures classified as bad loans and unlikely to pay, according to the categories specified below, is the difference between the carrying amount and the present value of estimated cash flows discounted at the original interest rate of the financial asset.

For all fixed rate positions, the interest rate thus determined is kept constant in subsequent financial years, while for floating rate positions the interest rate is updated according to contractual terms.

If the original interest rate cannot be found, or if finding it would be excessively burdensome, the rate that best approximates it is applied, also recurring to “practical expedients” that do not alter the substance, and ensure consistency with the international accounting standards.

Recovery times are estimated on the basis of business plans or forecasts based on historical recovery experience observed for similar classes of loans, taking into account the customer segment, the type of loan, the type of security and any other factors considered relevant.

Also the impairment on impaired exposures was calculated as required by IFRS 9 to include (i) the adjustments necessary to arrive at the calculation of a point-in-time and forward-looking loss; and (ii) multiple scenarios applicable to this type of exposure including any sale scenarios in case Group strategy on Non-Performing Asset Strategy for the period 2018-2020 foresees the recovery through sale on the market.

More details regarding IFRS9 first time adoption of the Group can be found in note 4.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

j) Non-current assets held for sale / discontinued operations

A non-current asset (or disposal group) is classified as held for sale if its carrying amount will be recovered principally through a sale transaction rather than through continuing use.

For this to be the case, the asset (or disposal group) must be available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets (or disposal groups) and its sale must be highly probable.

For the sale to be highly probable, the appropriate level of management must be committed to a plan to sell the asset (or disposal group), and an active programme to locate a buyer and complete the plan must have been initiated. Further, the asset (or disposal group) must be actively marketed for sale at a price that is reasonable in relation to its current fair value. In addition, the sale should be expected to qualify for recognition as a completed sale within one year from the date of classification and actions required to complete the plan should indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

A discontinued operation is a component of an entity that either has been disposed of, or is classified as held for sale, and

- (a) represents a separate major line of business or geographical area of operations,
- (b) is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations or
- (c) is a subsidiary acquired exclusively with a view to resale.

The Bank measures a non-current asset (or disposal group) classified as held for sale at the lower of its carrying amount and fair value less costs to sell. For the period the asset is classified as held for sale the depreciation ceases and is tested periodically for impairment.

The non-current asset is reclassified out of non-current assets held for sale when it is sold or the conditions to be recognized as held for sale are no longer met.

As of 30 June 2018, the Group classified the operations of UniCredit Insurance Broker as a discontinued operation. The participation is held for sale at the end of the reporting period as it is available for immediate sale in its present condition and a sale transaction is estimated to take place in less than 12 months. The sale will take place with 2 entities part of UniCredit Group and was determined by a reorganisation of the shareholdings within the Group. The transaction was already approved by the shareholders of UniCredit Insurance Broker by the end of reporting period and will be finalised after the approval by the Financial Supervision Authority.

4. FINANCIAL RISK MANAGEMENT

The Group has developed specific models for calculating the expected loss; such models are based on the parameters of PD, LGD and EAD and on the effective interest rate. In particular:

- the PD (Probability of Default), represents the probability of occurrence of an event of default of the credit exposure, in a defined time lag (i.e. 1 year);
- the LGD (Loss Given Default), represents the percentage of the estimated loss, and thus the expected rate of recovery, at the date of occurrence of the default event of the credit exposure;
- the EAD (Exposure at Default), represents the measure of the exposure at the time of the event of default of the credit exposure;
- the Effective interest rate is the discount rate that expresses of the time value of money.

4. FINANCIAL RISK MANAGEMENT (continued)

Such parameters are calculated starting from the corresponding parameters used for regulatory purposes, with specific adjustments in order to ensure consistency between accounting and regulatory treatment despite different regulatory requirements. Main adjustments were aimed at:

- removing conservatism required for regulatory purposes;
- introducing “point-in-time” adjustments to replace “through-the-cycle” adjustments required for regulatory purposes;
- including “forward looking” information;
- extending credit risk parameters to a multi-year perspective.

With reference to lifetime PD, through-the-cycle PD curves obtained by adjusting observed cumulated default rates were calibrated in order to reflect point-in-time and forward-looking forecasts on portfolio default rates. Recovery rate incorporated into through-the-cycle LGD was adjusted in order to remove conservatism and to reflect most updated trend of recovery rates as well as expectations about future trends discounted at effective interest rate or at its best proxy.

The lifetime EAD has been obtained by extending the 1 year regulatory or managerial model, removing margin of conservatism and including expectation about future drawing levels.

With reference to the qualitative component of the model for stage allocation, the Group has adopted a statistical approach based on a *quantiles regression* whose objective is to define a threshold in terms of maximum variation acceptable between the PD at the time of origination and the PD assessed at the reporting date. The variable objective of the regressive model is thus the change between the PD at the reporting date compared to the one at the date of origination while the explicative variables are factors such as the age of the transaction, the PD at the date of origination, etc.

A key component of the model is the definition of the quantile that identifies the amount of Stage 2 expected on average in the long-run and that affects the determination of the threshold of change in PD after which the transaction is classified in Stage 2. The average quantile in the long run is determined based on the expected average of deterioration of the portfolio determined by the rate of defaults as in any other deterioration stage (i.e.: 30 days past due).

The amount of exposures classified in Stage 2 at each reporting date will be around the quantile identified for the long run based on the economic conditions at the time and on the future expectations about the evolution of the economic cycle.

With reference to stage 3, it should be noted that it includes impaired exposures corresponding to the aggregate Non-Performing Exposures as defined by ITS EBA (EBA/ITS/2013/03/rev1 24/7/2014).

In particular, EBA has defined as “Non-Performing” exposures that meet one or both of the following criteria:

- material exposures more than 90 days past due;
- exposures for which the bank values that is unlikely that the debtor would pay in full his credit obligations without recurring to enforcement and realization of collaterals, regardless of past due exposures and the number of days the exposure is past due.

4. FINANCIAL RISK MANAGEMENT (continued)

Prospective information for the calculation of value adjustments

The expected credit loss deriving from the parameters described in the previous paragraph considers macroeconomic forecasts through the application of multiple scenarios to the “forward looking” components in order to compensate the partial non-linearity naturally present in the correlation between macroeconomic changes and credit risk. Specifically, the non-linearity effect was incorporated through the estimation of an overlay factor directly applied to the portfolio Expected Credit Loss.

The process defined to include macroeconomic multiple scenarios was fully consistent with macroeconomic forecast processes used by the Group for additional risk management objectives (as for example processes adopted to calculate expected credit losses from macroeconomic forecasts based on EBA stress test and ICAAP Framework) and also took advantage of independent UniCredit Research function. The starting point was therefore fully aligned despite while the application is differentiated in order to comply with different requirements using internal scenarios only.

In particular, UniCredit Group Romania has selected three macroeconomic scenarios to determine the forward looking component, a baseline scenario, a positive scenario and a negative scenario.

The baseline scenario is the main scenario and indeed is expected to be the one with the highest likelihood of occurrence. The positive and the negative scenario represent alternative occurrences, either better or worse when compared to the baseline scenario in terms of evolution of the economy

- The Base Scenario (“Baseline”) reflects the macroeconomic evolution expected by the Group and as such is coherent with the assumptions used in the planning processes. The Baseline Scenario foresees an economic growth stable and positive, both for the Eurozone and for the CEE countries, in a context where the interest rates in the Euro area are expected to be slightly growing even though they continue to be at historical low levels. Specifically, the annual growth of the real GDP for the Eurozone is foreseen at +1,8% for 2018 and +1,5% for 2019 while the foreseen growth for the CEE countries is +2,4% in 2018 and +2,2% in 2019. The Scenario implies that the 3 months Euribor stays negative for 2018 and comes back near zero in 2019.
- The Positive Scenario is based on the hypothesis that the positive economic growth of 2017 both at global level and at European level might consolidate even in 2018, sustained by the trend in the global commerce and by accommodating economic policies. This would imply, for the biggest European countries, a maximum phase of the economic cycle prolonged by a year, that would reflect in a bigger growth of the annual real GDP (with respect to the baseline scenario) of about 0,2%-0,5% both in 2018 and in 2019. Specifically, the annual growth of the real GDP for the Eurozone would grow to +2,3% for 2018 and +1,9% for 2019 in a context of short term rates (3 months Euribor) still negatives or close to zero. The occurrence of such scenario, at the moment of its definition, is expected to be plausible and appropriate to quantify a better trend of the economy than the one assumed in the Baseline scenario.
- The Adverse Scenario reflects one of the scenarios used in the evaluation processes of the capital adequacy (ICAAP). In coherence with the ICAAP framework, the scenario has been chosen to represent one of the macroeconomic and financial risks that the Groups foresees as most relevant. The scenario of Widespread Contagion is based on a hypothesis of intensification of political risks of the European Union, caused by an increased influence of populist parties in Italy, Germany and France alongside with, among others, the extension of tension between Spanish government and Catalonia Region. This context would lead to an increase of the risk premiums for different “asset class” and to a slowdown of the economic growth both of the Eurozone (lower of about 1.5per year with respect to the baseline scenario, in terms of real GDP) and of CEE countries (lower of about 2. points percentage, respectively). Specifically, the annual growth of the GDP in for the Eurozone would be +0,4% for 2018 and -0,1% for 2019 in a context of rates in the short run (3months Euribor) that would stay negative even in 2019, based on the hypothesis that the ECB would prolong in such a market context the liquidity support to markets. The likelihood of happening of such scenario, at the time of its definition, is foreseen probable and appropriate to quantify the adverse trend of the economy. In coherence with the scenario and with the magnitude of changes compared to the baseline scenario, it is assumed that the negative scenario is less likely than the positive scenario.

4. FINANCIAL RISK MANAGEMENT (continued)

The forecasts in terms of changes in the “Default rate” and in the “Recovery Rate” provided by the Stress Test functions are included within the PD and LGD parameters during calibration. Credit parameters indeed, are normally calibrated over a horizon that considers the entire economic cycle (“Through-the-cycle – TTC”), it is thus necessary a “Point-in-time– PIT” calibration and a “Forward-looking – FL” one that allows to reflect in those credit parameters the current situation and the expectations about the future evolution of the economic cycle.

In this regard, the PD parameter is calculated through a normal calibration procedure, logistics or Bayesian, using as anchorage point an arithmetic average among the latest default rates observed on the portfolio and the insolvency rates foreseen by the Stress Test function. The PD determined in such way will lose his through the cycle nature in favour of a Point in time and Forward looking philosophy.

The LGD parameter is made Point in time through a scalar factor that allows to take into account the ratio between average recoveries throughout the period and recoveries achieved in previous years. The inclusion of forecast within the LGD parameter is performed by adjusting the yearly “recovery rate” implicit in this parameter to take into account the expectations of variations of recovery rates provided by the Stress Test function.

Sale scenarios

The assessment of impaired exposures (stage3) also considered sale scenarios whereas the Group's Non-Performing Asset Strategy for the period 2018-2020 foresees the sale on the market as a recovery method.

For this purpose, the presumed recovery value of credit exposures included in the aforementioned Non Performing Asset Strategy was determined as weighted average between two scenarios:

- internal recovery scenario, whose expected recovery value is estimated assuming an internal work-out process according to what has previously been described.
- Sale scenario, whose expected recovery value is estimated assuming the sale of the exposures on the market. The expected sale price is determined considering market or internal information based on the following hierarchy:
 - prices deriving from past sales of impaired loans with homogeneous characteristics with those evaluated;
 - prices observable on the market for impaired loans with homogeneous characteristics with those evaluated;
 - internal evaluation models

In order to calculate the weighted average, the probability of sale of credit exposures is defined by the appropriate Group structures on the basis of the volume of the sales forecasted by the aforementioned Non Performing Asset Strategy compared to the total gross exposure of the portfolio being valued. The probability of internal recovery is equal to the complement to 1 of probability of sale.

5. USE OF ESTIMATES AND JUDGMENTS

The preparation of these interim condensed consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses.

With the exception of the new elements brought by the IFRS9 implementation which are presented in “Accounting Policies” and “Financial Risk Management” chapters, in preparing the interim condensed consolidated financial statements the significant judgments made by management in applying the Bank’s accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at for the year ended 31.12.2017.

6. NET INTEREST INCOME

In RON	30.06.2018	30.06.2017
Interest Income		
Interest and similar income arising from:		
Loans and advances to customers *	559,608,887	462,687,161
Net Lease receivables	84,254,737	74,199,713
Treasury bills and bonds	82,245,723	61,168,500
Current accounts and placements with banks	49,786,462	15,248,772
Hedging instruments	-	610,234
Others (including derivatives)	12,626,797	20,113,882
Total interest income	788,522,606	634,028,262
Interest expense		
Interest expense and similar charges arising from:		
Deposits from customers	92,351,641	42,104,191
Loans from banks and other financial institutions	61,014,163	70,343,462
Deposits from banks	20,187,712	14,328,350
Repurchase agreements	3,358,793	5
Interest related to bonds issued	25,114,651	17,511,843
Others (including derivatives)	8,126,508	13,771,434
Hedging derivatives	1,998,882	-
Total interest expense	212,152,350	158,059,285
Net interest income	576,370,256	475,968,977

*) Included in interest income for a total amount of RON 25,215,166 (30 June 2017: RON 31,789,845) related to interest income on impaired loans. Interest income and expenses for assets and liabilities other than those carried at fair value through profit or loss are calculated using the effective interest rate method.

7. NET INCOME FROM TRADING

In RON	30.06.2018	30.06.2017
Net gains from foreign exchange operations (including FX derivatives)	149,858,900	129,597,766
Net gains/(losses) from interest derivatives	2,401,076	(1,828,729)
Net income from trading bonds	(463,498)	3,237,544
Net gains/(losses) from commodities derivatives	120,566	26,283
Net income from trading of financial assets at fair value through profit and loss	151,917,044	131,032,864

8. PERSONNEL EXPENSES

In RON	30.06.2018	30.06.2017
Wages and salaries	188,561,763	148,687,040
Social security charges, unemployment fund and health fund	5,242,606	33,926,931
Other (income)/costs	(1,087,800)	414,357
Total	192,716,569	183,028,328

The Group number of employees at 30 June 2018 was 3,292 (31 December 2017: 3,348).

9. OTHER ADMINISTRATIVE COSTS

In RON	30.06.2018	30.06.2017
Office space expenses (rental, maintenance, other)	57,632,558	56,984,354
IT services	43,462,947	41,843,524
Other taxes and duties	32,986,112	67,862,487
Communication expenses	11,172,785	10,985,227
Advertising and promotional expenses	13,863,770	10,470,281
Consultancy, legal and other professional services	4,700,083	5,975,836
Materials and consumables	6,336,130	5,692,643
Personnel training and recruiting	2,063,750	1,913,780
Insurance expenses	1,497,566	1,716,462
Other	2,490,254	6,602,049
Total	176,205,955	210,046,643

10. NET IMPAIRMENT LOSS ON FINANCIAL ASSETS

In RON	30.06.2018	30.06.2017
Net provision charges for loans and advances to customers	(102,324,742)	(124,863,907)
Loans written-off	(494,973)	(472,541)
Net provision charges for lease receivables	(16,927,281)	(18,910,696)
Recoveries from loans written-off	12,490,808	14,982,786
Net provisions charges for other financial instruments	(6,511,994)	2,383,386
Net impairment losses on financial assets	(113,768,182)	(126,880,972)

11. INCOME TAX

In RON	30.06.2018	30.06.2017
Direct taxes at 16% of taxable profits determined in accordance with Romanian law	(73,804,181)	(42,273,861)
Correction of current income tax arising from previous year		63,673
Deferred tax income/(loss)	10,477,772	(3,268,200)
Income tax	(63,326,409)	(45,478,388)

Reconciliation of profit before tax with income tax expense in consolidated income statement

In RON	30.06.2018	30.06.2017
Profit/(loss) before tax	316,757,560	270,682,426
Taxation statutory rate of 16%	(50,681,210)	(43,309,188)
Non-deductible expenses	(20,110,114)	(11,071,497)
Non-taxable revenues	1,470,771	2,511,568
Origination and reversal of temporary differences	2,780,988	4,908,640
Fiscal credit	3,213,155	1,482,089
Income tax in the income statement	(63,326,409)	(45,478,388)

Reconciliation for the interim condensed consolidated cash flows.

In RON	Nota	30.06.2018
Profit before taxation – continued operations		316,757,560
Profit before taxation – discontinued operations	27	15,080,167
Provisions for discontinued operations	27	(4,098,338)
Total		327,739,389

12. CASH AND CASH EQUIVALENTS

In RON	30.06.2018	31.12.2017
Balances with National Bank of Romania	2,298,874,639	6,926,636,417
Cash (including cash in ATMs)	1,138,442,448	1,185,224,939
Short term Money Market placements	6,387,983,868	429,631,203
Current balances with other banks	50,617,523	32,779,217
Total	9,875,918,478	8,574,271,776

Reconciliation for the interim condensed consolidated cash flows.

In RON	Note	30.06.2018
Cash and cash equivalents of the Group		9,875,918,478
Cash and cash equivalents from discontinued operations	27	30,156,623
Cash and cash equivalents for the interim condensed consolidated cash flows		9,906,075,101

The balance of current accounts with the National Bank of Romania represents the minimum reserve maintained in accordance with the National Bank of Romania requirements. As of 30 June 2018, the minimum reserve level was set at 8% (31 December 2017: 8%) for liabilities to customers in RON and 8% (31 December 2017: 8%) for liabilities to customers in foreign currency both with residual maturity less than 2 years from the end of reporting period and for liabilities with the residual maturity greater than 2 years with reimbursement, transfer and anticipated withdrawals clause or 0% for all the other liabilities included in the calculation base.

13. FINANCIAL ASSETS / LIABILITIES HELD FOR TRADING AND DERIVATIVES USED FOR HEDGING

(i) Financial assets at fair value through profit or loss

In RON	30.06.2018	31.12.2017
Derivatives	67,885,636	69,225,191
Investment securities held for trading	255,031,197	52,157,080
Equity instruments *)	26,537,685	
Total	349,454,518	121,382,271

*) Until 31 December 2017, equity investments for VISA Inc were classified as "Equity investments available for sale"

(ii) Derivatives assets / liabilities

The derivative assets and liabilities held at fair value through profit and loss at 30 June 2018 may be summarized as follows:

	30.06.2018		
	Notional	Present value	
		Assets	Liabilities
Foreign currency derivatives			
Forward contracts	6,701,386,729	15,566,077	11,248,286
Purchased options	227,961,131	387,796	45,730
Sold options	227,961,131		383,496
Total foreign currency derivatives	7,157,308,991	15,953,873	11,677,512
Interest rates derivatives			
Interest Rate Swaps	5,226,352,605	30,291,828	34,212,482
Purchased options	883,884,068	20,828,369	
Sold options	883,884,071		20,627,469
Total interest rate derivatives	6,994,120,744	51,120,197	54,839,951
Other derivatives – bought merchandise	119,251,914	811,566	
Other derivatives – sold merchandise	119,251,914		780,888
Total derivatives – merchandise	238,503,828	811,566	780,888
Total	14,389,933,563	67,885,636	67,298,351

13. FINANCIAL ASSETS AND LIABILITIES HELD FOR TRADING AND DERIVATIVES USED FOR HEDGING *(continued)*

(ii) Derivatives assets / liabilities (continued)

The derivative assets and liabilities held at fair value through profit and loss at 31 December 2017 may be summarized as follows:

	31.12.2017		
	Notional	Present value	
		Assets	Liabilities
Foreign currency derivatives			
Forward contracts	4,622,934,594	14,205,127	23,112,965
Purchased options	47,611,383	18,674	7,281
Sold options	47,611,383		18,165
Total foreign currency derivatives	4,718,157,360	14,223,801	23,138,411

23. RELATED PARTY TRANSACTIONS (continued)

Transactions with key management personnel

A number of banking transactions are entered into with key management personnel (executive management, administrators of the Bank) in the normal course of business. These mainly include loans, current accounts and deposits. The volumes of related-party transactions are presented in the below tables:

In RON	30.06.2018	31.12.2017
Loans	4,604,241	7,857,125
Current accounts and deposits	20,023,625	19,029,251
Interest income	63,915	61,746
Interest expenses	(27,157)	(15,981)

In RON	30.06.2018	31.12.2017
Key management compensation	7,199,397	11,919,023
Total	7,199,397	11,919,023

In addition to their salaries, the Bank also provides non-cash benefits to directors and executive officers and they participate in the UniCredit Group's Incentive system. The Group Incentive System is fully aligned with relevant regulatory requirements and the UniCredit Group Compensation Policy.

24. COMMITMENTS AND CONTINGENCIES

At any time, the Group has outstanding commitments to extend credit. These commitments take the form of approved loans and credit card limits and overdraft facilities. Outstanding loan commitments have a commitment period that does not extend beyond the normal underwriting and settlement period of one month to one year.

The Group provides financial guarantees and letters of credit to guarantee the performance of customers to third parties. These agreements have fixed limits and generally extend for a period of up to one year. Expirations are not concentrated in any period.

The contractual amounts of commitments and contingent liabilities are set out in the following table by category. The amounts reflected in the table for commitments assume that amounts are fully advanced. The amounts reflected in the table for guarantees and letters of credit represent the maximum accounting loss that would be recognized at the balance sheet date if counterparties failed completely to perform as contracted.

In RON	30.06.2018	31.12.2017
Loan commitments	2,209,692,526	1,730,417,815
Letters of credit	162,069,302	193,764,422
Guarantees issued	4,681,466,524	4,617,613,782
Total	7,053,228,352	6,541,796,019

24. COMMITMENTS AND CONTINGENCIES (continued)

The Group acts as a security agent, payment agent and hedging agent for a series of loan contracts between UniCredit SpA and other entities within UniCredit Group as lender and Romanian companies as borrowers. For each of these contracts there is a risk participation agreement by which the Group takes the obligation to pay to UniCredit SpA any instalment that the borrowers failed to pay.

The total amount of such risk participation agreements in force as at 30 June 2018 is EUR 35,785,453 (31 December 2017 is EUR 37,439,447).

As compensation for the financial guarantees assumed by the risk participation agreements and for providing security and payment agent services to UniCredit SpA, the Bank receives the commissions paid by the borrowers plus a portion of the interest margin collected from the borrowers. The Group defers the commissions collected upfront from the risk participation agreements over the time period that remains until the maturity of the facilities.

The Bank concluded with UniCredit SpA a series of novation contracts through which loan contracts initially concluded by the bank with the Romanian companies were transferred to the UniCredit SpA in exchange for full reimbursement of borrowers' exposure towards UniCredit SpA. Subsequent to the signing of the novation contracts, the Group becomes lender of record while related the risk participation agreement is cancelled.

25. FINANCIAL INSTRUMENTS - FAIR VALUE HIERARCHY

The table below presents the fair value of financial instruments measured at fair value at the end of the reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorised as of 30 June 2018:

In RON	Level 1	Level 2	Level 3	Total fair value	Total book value
Financial assets held for trading and hedging instruments					
Financial assets for trading at fair value through profit and loss	255,031,196	67,498,167	387,470	322,916,833	322,916,833
Derivative financial instruments designed as hedging instruments	0	4,117,405	0	4,117,405	4,117,405
Total assets held for trading and hedging	255,031,196	71,615,572	387,470	327,034,238	327,034,238
Financial assets at fair value through other comprehensive income					
Debt securities	5,689,827,302	240,984,476	0	5,930,811,778	5,930,811,778
Equity instruments			7,014,601	7,014,601	7,014,601
Total financial assets at fair value through other comprehensive income	5,689,827,302	240,984,476	7,014,601	5,937,826,379	5,937,826,379
Non-tradable financial assets at fair value through profit and loss					
Equity instruments	0	26,537,685	0	26,537,685	26,537,685
Total financial assets at fair value through profit and loss	0	26,537,685	0	26,537,685	26,537,685
Financial liabilities held for trading					
Derivative financial liabilities at fair value through profit and loss	0	66,869,442	428,910	67,298,352	67,298,351
Derivative financial liabilities designed as hedging instruments	0	73,009,558	0	73,009,558	73,009,558
Total liabilities at fair value through profit and loss	0	139,879,000	428,910	140,307,910	140,307,909

25. FINANCIAL INSTRUMENTS - FAIR VALUE HIERARCHY (continued)

The table below presents an analysis of financial instruments at amortised cost and respectively at fair value at the end of the reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorized as of 31 December 2017:

In RON	Level 1	Level 2	Level 3	Total fair value	Total book value
Financial assets held for trading and hedging instruments					
Financial assets for trading at fair value through profit and loss	52,157,080	67,206,937	2,018,254	121,382,271	121,382,271
Derivative financial instruments designed as hedging instruments		4,196,748		4,196,748	4,196,748
Total assets held for trading and hedging	52,157,080	71,403,685	2,018,254	125,579,019	125,579,019
Assets available for sale					
Securities held for trading	5,343,368,046	633,692,784	25,012,183	6,002,073,013	6,002,073,050
Total assets available for sale	5,343,368,046	633,692,784	25,012,183	6,002,073,013	6,002,073,050
Liabilities held for trading					
Derivative liabilities at fair value through profit and loss		78,187,889	1,832,023	80,019,912	80,019,912
Derivative liabilities designed as hedging instruments		76,165,933		76,165,933	76,165,933
Total liabilities held for trading		154,353,822	1,832,023	156,185,845	156,185,845

26. TRANSITION TO IFRS 9

The adoption of IFRS9 at the 1st of January 2018 has determined:

- an overall negative effect on consolidated net equity for an amount of RON 63,808,165, representing 189 bps of the CET1;
- an overall negative effect on CET1 ratio equal to -21 bps;
- the increase of loan loss provisions to an amount equal to RON 56,151,086.
- The Group's Balance Sheet as at 1.1.2018 is presented below (figures in RON):

In RON	01.01.2018		31.12.2017	
	IFRS 9		IAS 39	
Assets				
Cash and cash equivalents	8,571,149,328		8,574,271,776	
Financial assets at fair value through profit and loss	141,411,298			
- Financial assets held for trading	121,382,271			
- Non-tradable financial assets mandatory at fair value through profit and loss	20,029,027

Share capital	1,101,604,065	1,101,604,066
Share premium	55	55
Cash flow hedge reserve	(48,922,704)	(48,922,704)
Reserve on financial assets at fair value through other comprehensive income	(54,954,670)	(53,502,857)
Revaluation reserve on property and equipment	9,672,847	9,672,847
Other reserves	244,827,557	244,827,555
Retained earnings	2,249,741,910	2,307,202,067
Total equity for parent company	3,501,969,060	3,560,881,029
Non-controlling interest	145,185,461	150,217,731
Total liabilities and equity	43,445,495,017	43,499,220,551

- a. the item “Financial assets at fair value through profit and loss according to IAS 39”, containing derivative assets held for trading purposes, was completely reclassified into the new position “Financial assets held for trading”
- b. the new item “ Financial Assets at amortised cost” contains the previous positions of Loans and advances to Banks, Net Lease receivables and Loans to customers – all 3 positions fully reclassified at amortised cost, but adjusted due to the application of the new impairment rules and due to the impact from modification accounting, as detailed in the table below
- c. The item “Financial assets available for sale according to IAS 39” was classified as follows:
 - The complete reclassification of the debt securities in item Financial assets at fair value through comprehensive income
 - The reclassification of the equity participation in VISA as “Non-tradable financial assets mandatory at fair value through profit and loss”, as also presented in Note 13

26. TRANSITION TO IFRS 9 (continued)

IFRS 9 implementation impact:

In RON	30.06.2018
Provisions from on-balance exposures (including banks)	(56,151,086)
Modifications related to re-negotiated exposures according to IFRS 9.5.4.3	(2,263,384)
Intercompany transactions	99,721
Financial assets at fair value through other comprehensive income	3,360,361
Provisions from off-balance exposures	(10,167,147)
Other adjustments	1,313,370
TOTAL	(63,808,165)

With reference to the reclassifications of financial instruments in application of the new accounting standard, the following tables show separately for financial assets and liabilities:

26. TRANSITION TO IFRS 9 (continued)

Reclassification of financial assets

A: Reclassification of former IAS39 book value

B: Change in measurement

C: New book value as per IFRS9

The amount of loan loss provision on commitments and guarantees given are equal to RON 10,167,147 as reported in the Balance Sheet Liabilities at item Provisions for risks and charges: commitments and guarantees given.

27. DISCONTINUED OPERATIONS

As of 30 June 2018, the Group classified the operations of UniCredit Insurance Broker as a discontinued operation. The participation is held for sale at the end of the reporting period as it is available for immediate sale in its present condition and a sale transaction is estimated to take place in less than 12 months. The sale will take place with 2 entities part of UniCredit Group and was determined by a reorganisation of the shareholdings within the Group. The transaction was already approved by the shareholders of UniCredit Insurance Broker by the end of reporting period and will be finalised after the approval by the Financial Supervision Authority.

The amounts bellow are presented with intragroup transactions and balances because the Group expects that this subsidiary will no longer be part of the consolidation after its sale.

Statement of comprehensive income

In RON	30.06.2018
Interest income	95,232
Fee and commission income	16,495,378
Net income from trading and other financial instruments at fair value through profit or loss	461
Other operating income	348,532
Operating income	16,939,603
Personnel expenses	(778,662)
Depreciation and impairment of tangible assets	(4,758)
Other administrative costs	(247,432)
Other operating expenses	(828,737)
Operating expenses	(1,859,589)
Net operating expenses	15,080,014
Net impairment losses on financial assets	153
Profit/ (Loss) before taxation	15,080,167
Income tax	(2,412,827)
Net profit for the reporting period	12,667,340
Total comprehensive income for the reporting period	12,667,340
Impairment*	(4,098,338)
Net profit from discontinued operations	8,569,002

*For the difference between UniCredit Insurance Broker net assets as of 30th of June 2018 and the estimated net selling price of UniCredit Leasing Corporation, a provision of RON 4,098,338 was booked at consolidated level. Impairment is presented in the consolidated statement of financial position in "Other liabilities – discontinued operations", and the expense with impairment is presented in the statement of comprehensive income in "Net profit of the reporting period – discontinued operations".
